

FISCAL YEAR 2009/2010 UPDATES

- Users can now search for services by service id number. See the new module under Implementation-Service Search.
- Additional save and cancel buttons have been added to the top of all pop-up panels such as staff time and demographic information. This should save the time needed to scroll to the bottom of these sometimes long panels.
- Demographic counts of groups and single service attendees can now be identified as “Actual” or “Estimated”. See the new check boxes on the groups screen and demographic information panel.
- Counters have been added to all large text boxes to show how many remaining characters can be typed in each field.
- FNL participants can now be identified as mentors or protégés. See the new check boxes in the participant registration screen.
- “Months” is no longer available as a service duration type.
- County providers can now disable data entry for individual objectives. See the new functionality under “Assign Objective to Providers” panel under Objectives.
- There is now a bread crumb trail with page numbers in the standard reports section rather than just the next and previous buttons.
- County providers can now disable data entry in the Implementation module for their providers. See the new module “County/Provider Permissions” under Administration. County provider may also elect to require staff hours tracking from their providers using this module.
- Groups are no longer allowed to transfer from 08/09 into 09/10. Please re-create any existing groups as new groups.
- ADP can now easily add documents to the library. Check this section frequently. You may also see that the library documents can now be linked in the messages section on the home page.
- The FNL chapter profile link on the Program page now has a more descriptive text for the check box and link. The chapter profile has also been enhanced to allow more than 2 schools to be chosen for FNLM programs.
